

March 31, 2020

Dear Parents/Caregivers,

I would like to share a few quick updates with you:

1. Governor DeWine has officially extended to school closure to May 1, 2020. Anticipating the closure would go past April 6, a majority of our teachers have sent homework to cover the next three weeks. Teachers will continue to work with you and your student by providing online instruction and/or educational packets for the weeks ahead.
2. Most public schools may be able to complete their school year early since they typically go to the end of May. We have reached out to the City Health Department for guidance since we will still have 6-8 weeks of school after the end of May.
3. We are working with Goodwill Industries to do extra, professional cleaning in all the buildings while they are quiet. When students do return the buildings will be ready!

I want to thank each and every one of you for your patience and understanding through this difficult time. We want to be a resource for you and your students as much as possible. If you need help in any way please reach out to your site coordinator and let us know how we can help!!!

Stay safe and healthy!!!

Sincerely,

Paul J. Garchar Jr.
Executive Director
