

# Daily Home Screening for Students

*Parents: Please complete this short check each morning before your child leaves for school. If your child is sick or has any of the following symptoms below, please keep them home.*

## SECTION 1: Symptoms

If your child has any of the following symptoms, that indicates a possible illness that may decrease the student's ability to learn and also put them at risk for spreading illness to others. Please check your child for these symptoms:

	Temperature 100.4 degrees Fahrenheit or higher when taken by mouth
	Sore throat
	New uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)
	Diarrhea, vomiting, or abdominal pain
	New onset of severe headache, especially with a fever

## SECTION 2: Close Contact/Potential Exposure

	Had close contact (within 6 feet of an infected person for at least 15 minutes) with a person with confirmed COVID-19
	Traveled to or lived in an area where the local, Tribal, territorial, or state health department is reporting large numbers of COVID-19 cases as described in the <a href="#">Community Mitigation Framework</a>
	Live in areas of high community transmission (as described in the <a href="#">Community Mitigation Framework</a> ) while the school remains open

A Potential Development staff member will meet you and your student when arriving at the school to take students temperature and ask if you have completed the daily screening. Students will not be permitted in the building until the temperature is taken and screening confirmed.

If a child becomes ill at school, we will notify you immediately and pick up of child must be arranged as soon as possible. Please make sure the front office has your update contact information and authorized pick up list for your student.
